Healthcare Solutions

There are complex challenges in
Healthcare and Technology,
Don’t trust your software development
to anyone but a **PhD**!

SoftServe PhD
roven high-quality software Development

SoftServe
Ability. Agility. Advantage.

The SoftServe**Solution**

Today, the Healthcare Industry is faced with ever-growing challenges:

- Increased government regulations
- e-business challenges
- Rising patient expectations
- Demand for lower healthcare costs

These challenges have driven healthcare organizations to innovate at "lightening speeds," demanding that technology projects be delivered faster and more efficiently. However, quality cannot be sacrificed for speed. With the increase in health hazards, ensuring good health is, and has always been, one of the most important concerns today. This combined with the technical expertise that the world has achieved; there is a light at the end of the tunnel in the form of online healthcare solutions that are sure to make lives easier than ever before.

SoftServe designs, implements and maintains healthcare software solutions from streamlining electronic health records, to embarking on new mobility developments. Your industry needs SoftServe, a solutions partner that meets your complex challenges head-on.

SoftServe specializes in creating and implementing mission-critical applications that deliver healthcare specific solutions. From safeguarding the sensitivity of data to understanding HIPAA compliance issues, we enhance your capabilities.

- Enhanced Security. Medical data is very sensitive and SoftServe has the experience to handle it securely and with care.
- Compliance. We have the understanding and experience with compliance and security issues.
- Integration. SoftServe has the ability to deliver value-added integration services to enhance existing systems with added functionality, flexibility and scalability, delivering a faster return on investment.
- Industry Specific Experience. We have partnered with the top healthcare providers in the country.

What We Deliver

Healthcare Software Strategy

- Business Analysis
- Requirements Definition
- Scope & Estimate
- Organization Gaps and Risks

Healthcare Software Solutions

- SaaS/Cloud
- Mobility
- Software Development Lifecycle

Healthcare Software Development

- Product management processes
- Requirements gathering
- User adoption and business value
- QC and QA process
- Maintenance and support

Healthcare Case Study

The Challenge

Our Client is the leader in software, services, information and connectivity solutions that empower physicians and other healthcare providers to deliver best-in-class patient care, safety, clinical outcomes and financial results. The Client needed to redesign a homecare system which improves the clinical quality of care, financial performance, and operational control for large, integrated home care organizations, as well as small home care agencies. Also, it was critical that the application run on the next generation Windows phone 7.

Our Solution

SoftServe created a mobile application functional prototype targeted towards Home Health Aids that added additional functionality and served as a direct replacement for their legacy PDA solution.

Achievements

The new mobile application enhances the experience for the users by moving the clinical part of the homecare application to a mobile Windows Phone 7 platform, allowing caregivers to view, document, and transmit complete and incomplete services for patients using only their mobile phones. This provides caregivers incredible mobility and efficiency. The application won a Microsoft Health Users Group Innovations Award.

The SoftServe Difference

SoftServe, founded in 1993, is a leading global provider of Proven high-quality software Development for healthcare enterprises and healthcare independent software vendors. But, we are so much more.

- 18 years of deep industry knowledge and expertise
- Over 2,500 projects for over 150 companies worldwide
- Multiple service offerings from custom software development to user experience design
- Commitment to true partnerships and a client-first approach
- Open and Continuous Communication
- Dedication to best practices and processes
- On-shore/Off-shore service model
